Detailed Bug Reports

Bug ID: BUG_SIGNIN_03

Title: Unauthorized Access to Quiz via Login Redirect
Module: Sign In / Login
Category: Security
Priority: High | **Severity:** Critical
Status: New

Description:
Clicking the "Login" link on the Signup page incorrectly redirects the user to the Quiz page instead of the Login page, allowing a bypass of the login process.

Steps to Reproduce:
1. Navigate to the Signup page.
2. Locate the “Login” link at the bottom.
3. Click the link.

Expected Result:
Should redirect to the Login page.

Actual Result:
Redirects directly to the Quiz page.

Bug ID: BUG_SIGNIN_01

Title: Google Sign-In Button Unresponsive
Module: Sign In / Login
Category: Functional

Priority: High | **Severity:** Major
Status: New

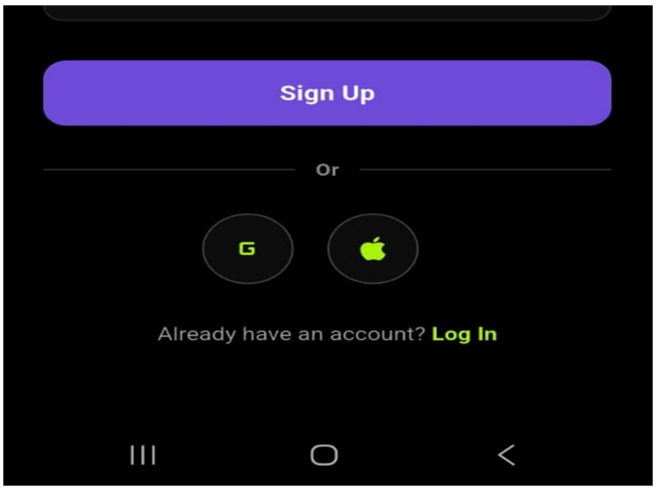
Description:
The Google Sign-in button does not trigger any action when clicked.

Steps to Reproduce:
1. Open the Sign In page.
2. Click the “Google Sign-in” button.

Expected Result:
User should be redirected to the Google Authentication flow.

Actual Result:
Button is not functional; nothing happens.

Attachments / Screenshot:



Bug ID: BUG_STOCK_01

Title: Invest Now Button Unresponsive
Module: Stock Details
Category: Functional
Priority: High | **Severity:** Major
Status: New

Description:
The primary call-to-action “Invest Now” on the stock details page is broken.

Steps to Reproduce:
1. Navigate to any Stock Details page.
2. Click the “Invest Now” button.

Expected Result:
Should initiate the investment process/workflow.

Actual Result:
Button is not working.

Bug ID: BUG_STOCK_02

Title: Missing Input Validation for Large PKR Values
Module: Stock Details
Category: Functional
Priority: Medium | **Severity:** Moderate
Status: New

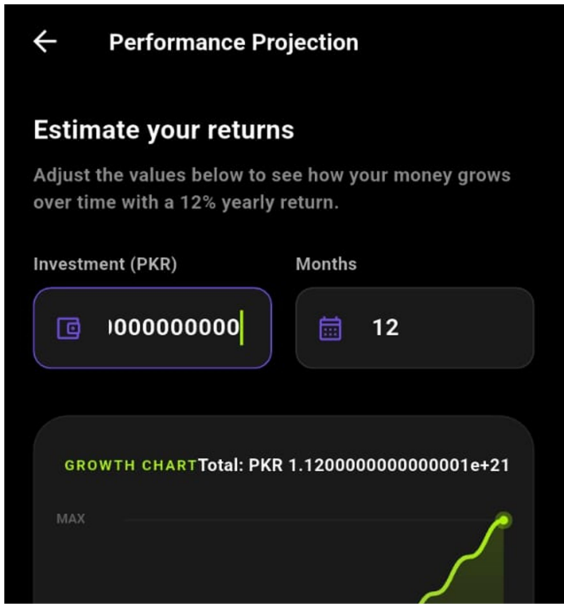
Description:
Performance graphs do not have an upper limit for PKR input, which can lead to UI breakage or overflow.

Steps to Reproduce:
1. Go to Stock Details.
2. Enter a very large numerical value (e.g., 100,000,000,000) into the PKR input field.

Expected Result:
System should handle input limits and validate the number.

Actual Result:
Accepts unlimited numbers without validation.

Attachments / Screenshot:



Bug ID: BUG_HOME_02

Title: Notification Icon Unresponsive
Module: Home Page
Category: Functional
Priority: Medium | **Severity:** Moderate
Status: New

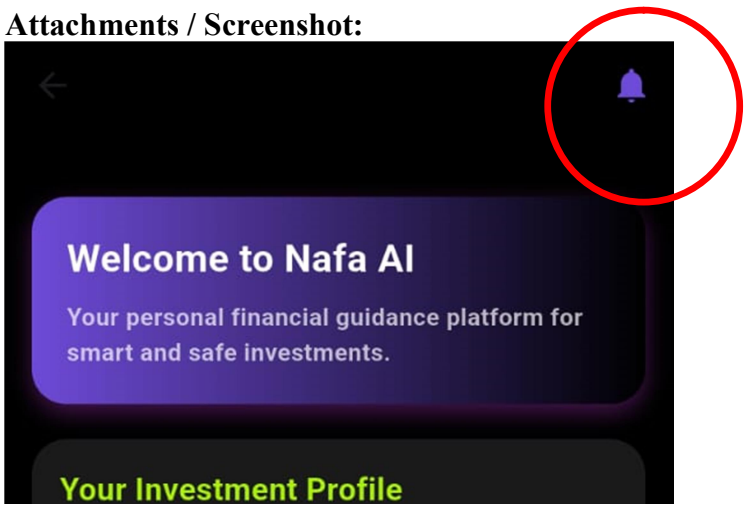
Description:
The notification icon on the home page does not open the notifications panel.

Steps to Reproduce:
1. Open the Home Page.
2. Click on the Notification (bell) icon.

Expected Result:
Should open the notifications section.

Actual Result:
Icon is not functional.

Attachments / Screenshot:



Bug ID: BUG_RECOMM_02

Title: Unnecessary Back Arrow on Recommendations Page
Module: Recommendations
Category: UI/UX
Priority: Low | **Severity:** Minor
Status: New

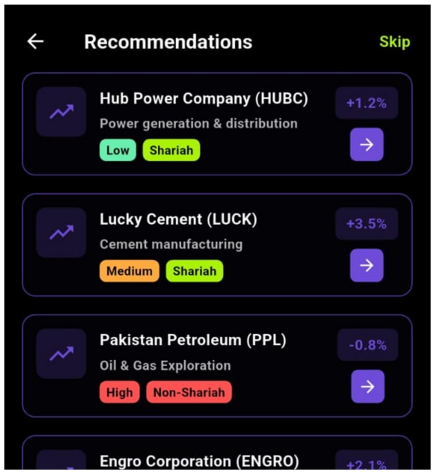
Description:
An unnecessary back arrow is present on the Recommendations screen which may confuse the user flow.

Steps to Reproduce:
1. Complete the Quiz or navigate to Recommendations.
2. Observe the top navigation bar.

Expected Result:
Back arrow should not be present (as it's a result screen).

Actual Result:
Back arrow is present.

Attachments / Screenshot:



Bug ID: BUG_HOME_01

Title: Redundant Back Arrow on Home Page
Module: Home Page
Category: UI/UX
Priority: Low | **Severity:** Minor
Status: New
Description:
A back arrow appears at the top of the homepage, which is the root level of the app.

Steps to Reproduce:
1. Land on the Home Page.
2. Check the top header.

Expected Result:
No back arrow should be visible on the main landing screen.

Actual Result:
Arrow is present.
